Introducing Integrity

Integrity is an ethical consultancy and service provider working in challenging and complex environments around the globe.

We help our clients succeed in fragile and challenging environments while building trust and understanding as the basis for transformative change.

We work across all phases of the program and project cycle, delivering eleven complementary services: research, evidence and analysis / monitoring, evaluation and learning / data and knowledge management / advisory / program and project management / grant and fund management / risk management / technical assistance / capability and capacity development / stakeholder engagement / communications. Our services are underpinned by the principles on which we were founded, a commitment to providing reliable information and evidence, and expert and high-quality delivery.

Headquartered in London and Washington DC, Integrity also has offices in Jordan, Kenya, and Pakistan. Our multi-national team of over 50 specialists deliver a diverse and global portfolio of projects for a range of government clients and international institutions including USAID, DFID, FCDO, the US State Department and the World Bank.

We are guided by an organizational vision, mission, and commitment.

Vision: Integrity sets the international standard for ethically delivered, expert services in conflict, post-conflict, and fragile contexts. We transform conflict and build stability, accountability, and prosperity.

Mission: We help clients and communities to build trust and understanding as the basis for transformative change. We do not advocate: we listen, comprehend, and recommend.

Commitment: We uphold the highest ethical standards in our service delivery, our employment of staff and our interaction with people. This ensures not only that our clients receive the best possible service but that we benefit the individuals and communities amongst whom we work. See our values [here](#).

Scope of work

The Senior GIS and Data Analyst will be one of the Key Personnel, and the primary Geographic Information System (GIS) expert supporting USAID and implementing partners through the MELS Activity in South Sudan. This position will require strong data literacy, written and oral communication skills, and high analytical thinking to take large data sets and translate them into actionable information for various internal and external stakeholders. S/he must provide recommendations on mapping products to support Mission decision-making as well as work with staff across the organization, including senior management and working-level staff to provide tailored recommendations and develop maps that can flexibly address data needs in a timely manner.

Project background – USAID/South Sudan MELS activity

The purpose of the Monitoring, Evaluation and Learning Support (MELS) activity is to provide USAID/South Sudan with flexible, demand-driven, technical services that augment the Mission's ability to achieve strong performance management of its portfolio through effective monitoring and evaluation. MELS will also serve as a tool to provide the Mission's GIS and mapping capability to inform decision-making; enhance collaborative learning and adaptation across the Mission; and provide general support for Mission planning, third party monitoring, evaluation, reporting, research, assessments, and special studies.

Your experience and expertise

- At least 7 years of experience in managing GIS databases with advanced working knowledge of GIS.
- A bachelor's degree in the field of computer science, geography, planning, or engineering and a certification in GIS.
- Local applicants encouraged.
