

Integrity's Internship Programme

Integrity's Internship Programme

Integrity's Internship programme allows talented young graduates to gain hands-on experience into the workings of a dynamic, fast-growing consultancy in the international development sector. Running since 2013, many of our current staff started off as interns, and we pride ourselves on providing a programme that offers substantial learning opportunities as well as real career growth.

As an intern at Integrity, you receive tailored training, guidance, and real responsibility from the beginning, quickly becoming an invaluable team player in our various offices. The programme offers Internship opportunities within different parts of the company, ranging from Research and Project Support, to IT, Finance, Marketing and Communications, and Business Development.

Our internships are paid, based out of our three offices in London, Beirut and Nairobi, and require a full-time commitment of at least three months. To qualify, candidates should preferably have attained an undergraduate degree or other experience, ideally in a business or international studies related field. Keep an eye out on our [Job Openings](#) page of our website and on our [LinkedIn page](#) for Internship advertisements and more specific application details.

“ One of the highlights of my internship was conducting desk-based research and identifying suitable consultants for an assessment of a humanitarian aid distribution programme in MENA. I later helped deliver the project when it was awarded to Integrity. ”

Will Lowrie - Intern for four months before becoming Data Knowledge Management Officer

“ The highlight of my internship was being involved in a project that contributed to the improvement of research capacity in Africa and the Middle East, fully endorsed by the stakeholders involved. This gave me first-hand experience of what carrying out development projects is all about. ”

Lula Dahir - Intern for five months before becoming Projects Officer Africa
